

## ■ ELECTRICAL BACK DOOR OUTSIDE HANDLE SYSTEM

### 1. General

- This system is provided on IS300 SportCross with a switch on the back door outside handle to open the back door electrically.  
Along with the adoption of this system, the key cylinder and the opener for the back door have been discontinued.
- An emergency lever has been provided in case the system does not operate due to a discharged battery or other malfunctions.
- This system activates when the following two conditions are met:
  - 1) Vehicle speed is 5 km/h less than.
  - 2) An all-door lock unlock signal is input into the body ECU through the operation of the unlock switch, driver side door key\*<sup>1</sup>, or wireless door lock remote control.

\*<sup>1</sup>: Except when the double locking system is activated.
