

■ WASHER-LINKED WIPERS WITH DRIP-PREVENTION FUNCTION

When the windshield wiper switch assembly is in OFF or AUTO and the windshield wiper switch assembly (washer switch) is turned ON for approximately 0.2 seconds or more, the wiper starts a LO operation at the same time as the washer fluid is sprayed.

- The wiper operates three times in LO after the windshield wiper switch assembly (washer switch) is turned OFF.
- As shown in the following diagram, after the end of this operation, the wiper operates once more. It does so after an interval time determined by the vehicle speed, so that any washer fluid drips are wiped away.

► Interval Time Table ◀

Vehicle Speed	km/h (mph)	Interval Time
0 to 59	(0 to 36.7)	Approx. 3 sec.
60 to 79	(37.3 to 49.1)	Approx. 5 sec.
80 to 119	(49.7 to 73.9)	Approx. 7 sec.
120 to 159	(74.6 to 98.8)	Approx. 5 sec.
160 to 169	(99.4 to 105)	Approx. 3 sec.
170 or more	(105.6 or more)	No operation
