

Air Conditioning System

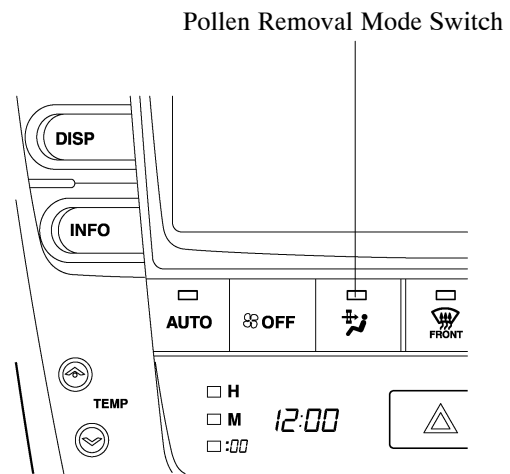

The automatic air conditioning system uses a left/right independent temperature control.

- Pollen removal mode control is used to remove pollen around the occupants of the front seats.
- When the pollen removal mode switch is pressed, the Pollen removal mode control is activated. Then, the air vent is switched to the FACE mode and recirculated pollen free air flows in the area around the upper part of the bodies of the driver and front passenger.

Dynamic Radar Cruise Control System

Besides the conventional type cruise control, the dynamic radar cruise control system includes a function that controls the distance from the vehicle ahead while driving based on the information of the driving lanes of the vehicle, the preceding vehicle, and vehicle speed (Vehicle-to-Vehicle Distance Control Mode).

Maintaining a set driving speed
(No vehicle ahead)

Maintaining a set time-gap, or
adjusting the speed to that of the
preceding vehicle to maintain a
set distance.
(with a vehicle ahead)
